

## Fiber Optic Storage System

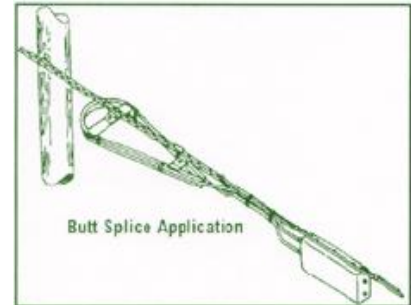

## Fiber Accessories

### Description

Utilization of the “opti-loop” fiber optic strand mounted storage system provides a convenient and industry approved method of storing slack fiber optic cable. The “Opti-Loop” system maintains the proper minimum bend radius and protects your fiber network from costly damages and outages. The “Opti-Loop” product is a premium quality, industry standard unit approved by CATV, Utility, and Telco companies across the US.

### Features

- All aluminum construction
- Continuous welds at crossbars and ends
- Stainless steel mounting bolts, nuts and washers included
- Ten models sized to accommodate fiber cable up to 1.20” O.D.
- Dual coat, baked on, polyester powder coat finish
- Tie eyelets designed to accommodate stainless steel and tie wrap installation methods
- Radius ends to ensure no sharp corners
- 25 year warranty
- Each pair individually boxed

### Product Details

Model	Channel Width	Overall Length	Diameter	Cable Application
