## NCO's Core Skills

NCO strives to provide the highest quality job at the best possible price in the following ways:

- 1. Deploying High End Technicians** and getting work assignments done effectively and on-time.
- 2. Experience** – Utilizing our experience working with all major MSO's to offer proven solutions to any project.
- 3. Providing Effective Project Managers** with experience working in Headend and Hubsite environments ensuring project timelines are met.
- 4. Using NCO's Distribution Capabilities** to offer turn-key solutions and reducing potential job slow downs due to material and equipment issues.

## Technical Services

NCO-Corp provides a highly skilled, experienced workforce to handle all of your headend or hubsite projects. We are experts at wiring, having successfully built or rewired headend or hubsite locations for major MSO's, small MSO's, and independent cable operators. Our inside plant technicians have experience in all aspects of headend operations from analog to facilities providing advanced voice, video, and data. Our ability to provide proven solutions to any wiring project has helped our clients to be more efficient in their HE designs saving space, time, and cost.

### What We Do?

- ~ Headend / Hubsite New Builds
- ~ Status Monitoring Installations
- ~ FCC Proof Testing
